

GEOFFREY KITHUKU

Junior Quality Assurance Engineer

mutembeikithuku12@gmail.com | +254 759 892 639 | linkedin.com/in/geoffrey-kithuku | geoffrey.fixloop.top

PROFESSIONAL SUMMARY

Software Engineer with practical experience testing and validating web and mobile applications, gained through full-stack development roles. Comfortable with manual testing, writing test cases against requirements, reproducing and reporting bugs, and basic SQL for data checks. Used to working in Agile teams and communicating with developers and stakeholders about issues found. Currently building QA skills further and looking to grow into a dedicated Quality Assurance role.

CORE SKILLS

Manual Testing • Test Case Writing • Bug Reproduction & Reporting • API Testing • Basic SQL • Cross-Browser & Usability Testing • Debugging (Laravel, JavaScript) • Agile Collaboration • Stakeholder Communication • Currently Learning: Test Automation Tools

EXPERIENCE

Software Engineer (QA-focused) | *Soma Siri Afrika (Consultant)* Aug 2025 – May 2026

- Tested backend APIs and frontend features to check they matched expected behavior before release.
- Helped identify and debug issues in Laravel-based systems, contributing to improved system stability.
- Worked with developers to reproduce reported bugs and verify fixes before deployment.
- Carried out end-to-end testing of new features and documented results for the team.

Web Developer & IT Support | *Molars Dental Hospital – Nairobi* Jan 2025 – Aug 2025

- Tested websites for functionality and usability, including checks across different browsers.
- Logged UI/UX issues found and worked with the team to get them fixed.
- Used basic analytics and reporting tools to help monitor site performance.
- Supported system reliability through routine monitoring and troubleshooting.

Software Developer | *Nobilis Limited – Nairobi* Jul 2024 – Sep 2024

- Helped test APIs during frontend-backend integration as part of an Agile team.
- Took part in code reviews and testing cycles alongside the QA and dev team.
- Debugged application issues ahead of release.
- Worked with QA and development teams to flag and resolve quality gaps.

Software Developer (Volunteer) | *TeckTick – Nairobi* Jan 2024 – Apr 2024

- Tested application features against functional requirements.
- Noted UI inconsistencies and usability issues found during development.
- Supported the team in following secure, stable development practices.

Mentor | *eMobilis Technology Training Institute – Nairobi* Oct 2024 – Dec 2024

- Supported students on debugging and testing practices, and code quality basics.
- Reviewed student projects and pointed out logical and functional errors.

Technical Support Intern | *Experts Business College – Kenya* Jun 2021 – Sep 2021

- Helped troubleshoot hardware and software issues to keep systems running.
- Documented issues and resolutions for future reference.

EDUCATION

Software Engineering Bootcamp — Moringa School, 2023

BSc Computer Science — Kisii University, 2022
